● **Higher Education: making EU's universities ready for the future through deeper transnational cooperation**

On **January 18, 2022**, the **European Commission** issued a **proposal for a COUNCIL RECOMMENDATION on building bridges for effective European higher education cooperation**. This Council Recommendation is part of the 'higher education package' announced in the Commission Work Programme 2022 under the headline ambition "Promoting our European way of life", together with a Commission Communication on a **European strategy for universities**. While the strategy sets a vision for the transformation of the higher education sector across Europe, the Recommendation is the first step of an incremental approach towards deeper, more sustainable and more effective transnational cooperation.

The Strategy and the Recommendation broaden opportunities for innovative transnational cooperation in the higher education sector, as working together more closely is essential for the EU to consolidate its role as a global player. Hence, there is a need to bring forces together through deeper cooperation.
